Vineyards

2021 MDV

100% CABERNET SAUVIGNON

2021 presented itself as a classic drought vintage. A low accumulation of rain in the winter coupled with a warm and dry summer provided smaller yields and greater concentration in the fruit leading up to an early harvest. With such depth and concentration, we chose to guide the fermentations gently and with care to preserve the delicacy and aromatics of the terroir. After 24 months of aging, the 2021 vintage wines capture the intensity, purity and resilience of our vines.

The 2021 MDV is 100% Cabernet Sauvignon intended to display the beauty and intensity of the Maya's vineyard Cabernet Sauvignon. The wine is electric violet in hue, is buzzing with energy and vibrant characteristics. Its streamlined fruit profile showcases notes of plum and black cherry, focused with dark undertones that lend depth and complexity. On the nose, there's a distinctive aroma of pencil shavings and a hint of anise and licorice, adding an intriguing layer of spice. The palate is seamless, displaying intensely concentrated tannins and energetic acidity, which are classic textural components iconic of this hillside vineyard. Less than 100 cases produced.
